

ST. VINCENT PALLOTTI COLLEGE OF ENGINEERING & TECHNOLOGY, NAGPUR NAAC Accredited with 'A' Grade

PROGRAMME SCHEME & SYLLABI 2021 – 2022

B. TECH.(Civil Engineering)

• About the department

Civil Engineering is one of the oldest disciplines that got consistently evolved right from the beginning of mankind. Civil Engineers play a vital role in National Development through innovation and planning various projects, analyzing, designing and maintaining infrastructure, essential for various other disciplines. Geotechnical Engineering, Structural Engineering, Water Resources Engineering, Irrigation Engineering, Environmental Engineering, Building Design and Construction Technology, Construction Management and Computer Applications are various spheres of Civil Engineering.

The institute introduced B.E. in Civil Engineering, in 2018 with the intake capacity as 60. The first batch of B.E. Civil Engineering is now moving to its final year. Currently, the department has six teaching faculty members with sound academic background and average teaching experience of 14 years. Students' 360-degree development to become a successful Civil Engineering Professional is the objective of the department. To fulfill the objective, the department is committed to conduct technical sessions by Industry Experts, encourage students for internship, and sign MoUs with the industries for students' training and field projects. The department is planning to provide bridge courses for technical & soft skill development of students and providing membership of professional organizations for practical exposure, under Industry – Academia Connect Practice.

• Vision

To develop disciplined Civil Engineers & Administrators meeting changing technological needs and providing solutions through professional engineering practice with relevant social concerns.

• Mission

- To impart knowledge for holistic career as a Civil Engineer Professional.
- To encourage entrepreneurship through research and consultancy related to Civil Engineering projects.
- To inculcate persistent learning of constantly upgrading tools & technology.

• Program education objectives

The Graduates will be able to

PEO1: Plan, analyze, design, execute and maintain Civil Engineering structures using fundamentals of Mathematics and principles in Engineering subjects, with sustainable approach.

PEO2: Handle new construction materials, tools and software in Civil Engineering oriented works.

PEO3:Practice ethically in a team with effective communication skills and Life- long learning objective to broaden the knowledge.

• Program outcomes

Engineering Graduates will be able to:

- Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern
 engineering and IT tools including prediction and modeling to complex engineering activities with an
 understanding of the limitations.
- The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- 12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

The students will be able to

PSO1: Achieve proficiency in Civil Engineering fields providing state of art solution according to needs of the society through research and as per the guidelines of Indian Standard Codes.

PSO2: Manage Civil Engineering projects using latest techniques of construction management with optimization of resources and sustainable approach.

PSO3: Pursue higher education for detailed knowledge and evolve adaptability for Civil Engineering industry through continued self-learning approach.

ANNEXURE – I

ST VINCENT PALLOTTI COLLEGE OF ENGINEERING & TECHNOLOGY MECHANICAL ENGINEERING

Credit Structure for Undergraduate program in Civil Engineering

(B. Tech Civil Engineering)

| Sr. No | Category | Credits | AICTE Norms |
|-----------|---|---------|----------------|
| 1 | Humanities, Social Sciences & Management courses | 15 | 15 |
| 2 | Basic Science courses | | 25 |
| 3 | Engineering Science courses including workshop, drawing, basics of electrical/mechanical/computer etc. | 18 | 24 |
| 4 | 4 Professional core courses | | 48 |
| 5 | Professional Elective courses relevant to chosen specialization/branch | 16 | 18 |
| 6 | Open subjects – Electives from other technical and /or emerging subjects | 12/18 | 18 |
| 7 | Project work, seminar and internship in industry or elsewhere | 20/14 | 15 |
| 8 | Mandatory Courses [Environmental Sciences, Induction training, Indian Constitution, Essence of Indian Knowledge Tradition] | 0 | 0 |
| 9 | Comprehensive Courses [Industry Training and Skill Development, Capstone Course] | 4 | 0 |
| | TOTAL | 170 | 163 |

** BoS specific

Option A - Credits of (Project - I + Project - II + One Semester Internship based

project)

Option B - Credits of (Project - I + Project - II + 6 (Project - III))

Semester Pattern
